DETAILED ACTION

Status of Claims

- 1. Claims 1-20 are pending.
- 2. Claims 3-8 are elected and rejected.
- 3. Claims 1, 2, and 9-20 are nonelected and withdrawn from consideration.

Election/Restrictions

- 4. Applicant's election with traverse of Group II, corresponding to claims 3-8, in Paper No. 7 is acknowledged. In addition, applicants have elected the species of dementia for the brain disorder. The traversal is on the ground(s) that the three Groups are related. This is not found persuasive because these Groups do have different functions and modes of operation. In particular, the method of screening of Group III would require a different field of search than a method of treating a brain disorder of Group II as well as methods of potentiating a N-type Ca²⁺ channel activity, which is directed in the field of electrophysical biochemistry and membrane conductance.
- 5. The requirement is still deemed proper and is therefore made FINAL.
- 6. This application contains claims 1-2 and 9-14 drawn to an invention nonelected with traverse in Paper No. 7. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Application/Control Number: 10/084,160

Art Unit: 1614

Information Disclosure Statement

Page 3

7. The information disclosure statement filed on October 17, 2002 has been reviewed and considered, see enclosed copy of PTO FORM 1449.

Claim Rejections - 35 USC § 112

- 8. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 9. Claims 3-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims are drawn to, "prophylaxis or treatment of brain disorders" with the instantly claimed compounds. The claimed methods of treatment, not to mention prophylaxis, fail to meet the requirement for an adequate written description of the claimed invention as required by 35 U.S.C. 112, first paragraph. There is insufficient descriptive support for the generic limitation, "prophylaxis or treatment of brain disorders" as well as the litany of diseases listed in claims 4 and 6 with the instantly claimed compounds. Furthermore, the claimed methods require treatment of unspecified diseases and there is no evidence in the instant specification, which supports these claims. In the absence of some

Art Unit: 1614

understanding of the conditions to be treated one of ordinary skill in the art would not have concluded that Applicant was in possession of the claimed methods.

- 10. Claims 3 and 4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is insufficient descriptive support for the phrase "a compound having an effect of specifically potentiating an N-type Ca²⁺ channel activity". In addition, the instant specification does not describe what is meant by the term/phrase "a compound having an effect of specifically potentiating an N-type Ca²⁺ channel activity" other than the compounds of formula (I). Structural identifying characteristics of the phrase "a compound having an effect of specifically potentiating an N-type Ca2+ channel activity" are not disclosed except for those compounds of formula (I). There is no evidence that there is any per se structure/function relationship between the phrase "a compound having an effect of specifically potentiating an N-type Ca²⁺ channel activity" other than those disclosed, namely the compounds of formula (I). The instant specification does provide an adequate written description for the phrase of "a compound having an effect of specifically potentiating an N-type Ca2+ channel activity". Accordingly, these claims fail to comply with the written description requirement.
- 11. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Application/Control Number: 10/084,160 Page 5

Art Unit: 1614

12. Claims 5 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear as to the meaning of the group, "ar(lower)alkoxy". In particular, it is unclear as to the meaning of the variable of "ar" as opposed to – aryl --. Consequently, these claims are rendered vague and indefinite.

Claim Rejections - 35 USC § 102

13. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 14. Claims 3-6 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Wang et al. Wang et al. teach of the administration of the anti-dementia drug of FK 960. This compounds is shown to ameliorate the memory deficits in various experimental models of dementia. In addition, this compound is shown to have an effect of the voltage-activated Ca²⁺ channels, (see abstract).

Claim Rejections - 35 USC § 103

- 15. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/084,160

Art Unit: 1614

16. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.

Page 6

- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 17. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 18. Claims 3-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wang et al. Wang et al. teach of the administration of the anti-dementia drug of FK 960. This compounds is shown to ameliorate the memory deficits in various experimental models of dementia. In addition, this compound is shown to have an effect of the voltage-activated Ca²⁺ channels, (see abstract). Although Wang et al. do not specifically recite the monohydrate salt of the instantly claimed compounds of FF906, the prior art reference of Wang et al. do teach of the very same compound that is claimed in this invention. It is well within the purview of the skilled artisan to select

Application/Control Number: 10/084,160

Art Unit: 1614

pharmaceutically acceptable salts, namely the monohydrate of a compound. It would have been obvious in view of Wang et al. for the skilled artisan to determine the pharmaceutically acceptable salt, such as the monohydrate of FK906, for the treatment against dementia.
